KARL/12.12.72

Detachable plastic block door frame - comprises two or more separable components one being screwed to soffit Q48

12.12.72-DT-260745 (20.06.74) E06b-01/30

The other part of the frame can be detachably fitted onto the part attached to the soffit and connected at the same time, with tongue and groove jointing. A covering strip may be formed onto the opposite ends of the two parts, and the second part may cover the heads of the screws used for fastening the first to the soffit. The frame can be easily replaced, in whole or in part. 12.12.72 as 260745

FIG. 1

FIG. 1 is a cross-sectional view of a multi-layered structure. The top layer (1) contains a central feature (8) with a pointed tip (7) extending downwards. This feature is surrounded by a complex arrangement of channels and walls (2, 3, 4, 5). A large, textured rectangular area (18) is positioned below the top layer, separated by a thin layer (17). The bottom layer (9) is a solid base. Dimensions 10, 17, 21, and 18 are indicated with arrows.

FIG. 2
